

The Philmac 3G™ range of compression fittings doesn't just represent the latest technology available; it is the next generation of pipe fitting. The 3G range is a global platform of pipe fittings. By simply changing the nut, split ring and seal, 3G™ fittings can effectively join any standard of PE pipe including normal gauge, metric and imperial pipe types. Featuring Philmac's unique Slide & Tighten® technology, 3G™ compression fittings make installation easy. No insert is required and no force is needed to push the pipe into the fitting. In addition, a visual stop indicator reduces the risk of over tightening.
