

The Next Generation Hep₂O is here.

**We invented push-fit plumbing.
So, who better to re-invent it?**

Hep2O/Acorn has always been the industry-standard for hot and cold water supply. And now after talking to professional plumbers and many years designing and testing the even better Next Generation Hep2O/Acorn is here.

The most important innovation in plumbing for decades, the new Hep2O/Acorn is packed with revolutionary new technology. It's now easier to fit, and groundbreaking new features include the secure HepKey™ demounting system and revolutionary In4Sure™ technology that actually tells you when the pipe's fully inserted.

The new range of fittings is compatible with both plastic and copper pipe and is backed by a unique, industry leading 50 year guarantee. But while the fittings are all-new, it's still the same easy to work with Hep2O/Acorn pipe that plumbers know and love
